                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         358
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                343
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            KAMQKAVERIVNKCGRLPLAILTIGAVLATKQVSBWEKFYEHLPSELEINPSLEALRRMV 418
                                                                                                                                                                                                                                                                                                                                                                                           The invention relates to novel broad-spectrum resistance gene Pi2 and the NBS(1-6) genes present in the Pi2 gene cluster region. The rice Pi2-like disease resistance nucleic acid molecules are useful for enhancing disease resistance in plants. The present sequence represents a rice NBS4
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               46
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        9
                                                                                                                                                                                                                                                                                                                         nucleic acid molecule that confers
for creating or enhancing disease
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                TNANDGPAKVICVVGMGGLGKTALSRKIFESEEDIRKNFPCNAWITVSQSFHRIELLKDM

                                                                                                                                    The invention comprises the amino acid and coding sequences of nucleotic binding site (NBS) proteins from the Oryza minuta Pi9 locus (bacterial blight and rice blast resistance genes). The DNA sequences may be used markers for resistance to infection with Magnaporthe grises in plant breeding programs. The present amino acid sequence represents an NBS protein encoded by a gene from the Oryza minuta Pi9 locus.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |: | :: | | :: | | EVSSRNTRYNLVEPISSGTED--DMDSYAEDIRNQSARNVDBAELVGFSDSKKRLLEMID

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          4
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     The invention comprises the amino acid and coding sequences of nucleotide binding site (NBS) proteins from the Oryza minuta P19 locus (bacterial blight and rice blast resistance genes). The DNA sequences may be used as markers for resistance to infection with Magnaporthe grisea in plant breeding programs. The present amino acid sequence represents an NBS protein encoded by a gene from the Oryza minuta Pi9 locus.

                                                                                                                                                                                                                                                                                                                                                                                                                                                              The invention relates to novel broad-spectrum resistance gene Pi2 and the NBS(1-6) genes present in the Pi2 gene cluster region. The rice Pi2-like disease resistance nucleic acid molecules are useful for enhancing disease resistance in plants. The present sequence represents a rice NBS2
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      ---GRSNGGPVVGMVASGNQSCLAIDSYAEDIRNQSARNVDEAELVGFSDSKKRLLEMID 103

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             The invention relates to novel broad spectrum resistance gene Pi2 and the NBS(1-6) genes present in the Pi2 gene cluster region. The rice Pi2-like disease resistance nucleic acid molecules are useful for enhancing disease resistance in plants. The present sequence represents a rice NBSI
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           RFEDGSSPQLEKIEIRFCRLESGIIGIIHLPRLKEISLGYESKVAGLAQLEGEVRTHPNH

                                                                                                                                                                                                                                                         68
                                              The invention comprises the amino acid and coding sequences of nucleoti binding site (NBS) proteins from the Oryza minuta Pi9 locus (bacterial blight and rice blast resistance genes). The DNA sequences may be used markers for resistance to infection with Magnaporthe grises in plant breeding programs. The present amino acid sequence represents an NBS protein encoded by a gene from the Oryza minuta Pi9 locus.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   68
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          The invention comprises the amino acid and coding sequences of nucleotic binding site (NBS) proteins from the Oryza minuta Pi9 locus (bacterial blight and rice blast resistance genes). The DNA sequences may be used markers for resistance to infection with Magnaporthe grises in plant breeding programs. The present amino acid sequence represents an NBS protein encoded by a gene from the Oryza minuta Pi9 locus.

Novel polypeptide and DNA encoding it used to produce plants resistant to fungal blast disease.
                                                                                                                                                                                             347 YNHLPSHLKPCFLYLSIFPEDFEIKRNRLVGRWIAEGFVRPKVGMTTKDVGESYFNELIN 406
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   The invention provides a protein which confers resistance to blast disease onto plants. The blast disease-resistance (Pi-b) protein can be expressed by standard recombinant methodology. The novel Pi-b gene is used to produce transgenic plants resistant to the rice blast disease, which will control the disease and increase crop yields. The present sequence represents the rice Pi-b protein. The resistance gene Pi-b is located at the end of the long arm of rice chromosome 2 and displays

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                The invention relates to novel broad-spectrum resistance gene Pi2 and the NBS(1-6) genes present in the Pi2 gene cluster region. The rice Pi2-like disease resistance nucleic acid molecules are useful for enhancing disease resistance in plants. The present sequence represents a rice NBS3

The invention relates to novel broad-spectrum resistance gene Pi2 and the NBS(1-6) genes present in the Pi2 gene cluster region. The rice Pi2-like disease resistance nucleic acid molecules are useful for enhancing disease resistance in plants. The present sequence represents an O. minuta Pi2 gene predicted amino acid sequence
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        NWINEIAFPKNNKKGSQIVITTWNVDLAEKCATAS-LVYHLDFLQMNDAITLLLLRKT--N 274
